Product Overview:

Red, blue and amber strobe lens for wall-mount L-Series and SpectrAlert Advance™ strobes open up new possibilities for visual warning systems. On a staged evacuation system, an amber strobe can be used for the “Alert” signal, meaning: “Get ready to evacuate”. A white or red strobe means “Evacuate Now!”

A blue strobe stands out from the red beacons on fire trucks and emergency vehicles. In the Auckland region, blue strobes are sometimes used for highlighting fire-fighter mimic panel locations.

Coloured lens may be used to convert any wall-mount L-Series and SpectrAlert Advance™ strobe from white to a coloured strobe light. Coloured strobes may be used as warning devices for Emergency Communication Systems (ECS) or Mass Notification Systems (MNS).

Coloured lens have a self-adhesive flange with a peel-off protective liner for quick, easy installation.

Coloured Lens for wall-mount
L-Series Strobes

Coloured Lens for older style wall-mount
SpectrAlert Advance Strobes

Features:

- ▶ Lens (LENS-A2-B2-R2) fit all wall-mount L-Series strobes and horn strobes including SRL and P2WL
- ▶ Lens (LENS-A-B-R) fit all wall-mount SpectrAlert Advance™ strobes and horn strobes including SR, SRK, P2W-P and P4R
- ▶ Easily adapt any wall-mount SpectrAlert Advance™ and L-Series strobes for ECS / MNS events such as severe weather, toxic gases, or sprinkler activation
- ▶ Outdoor rated from -37 °C to 66 °C
- ▶ Lens available in Amber, Blue and Red
