### F100A LCD Mimic (F100AM-3)

## Overview

The Pertronic F100A LCD Mimic (F100AM-3) allows remote display of messages from a F100A panel. All of the F100A keyboard-display functions can be performed by the mimic.

Up to 8 addressable mimics may be connected to a F100A panel and operate in 'full duplex' mode. Additional mimics may be connected in 'slave mode'.

In 'slave mode', system messages are displayed but no command interaction is available, except for silencing the in-built buzzer.
