

Fire Evacuation Accessories Firephone™ A 2096

PROFESSIONAL AUDIO PRODUCTS

A 2096 FIREPHONE

Designed specifically for use in Emergency Warning Systems. Warden Intercom Points (WIPs) are used to communicate between floor wardens and the main Emergency Evacuation Panel. When the handset is lifted, the Firephone automatically rings the Emergency Evacuation Panel. When the Emergency Evac Panel calls the WIP, the call tone sounds through the speaker in the body of the phone. When the handset is lifted, it automatically switches from the speaker in the body to the speaker in the handset. The firephone is manufactured from strong ABS and is fire engine red in colour.
