Weatherproof Audio Visual Sign (NZ)

Overview

The Pertronic Weatherproof Audio Visual Warning Sign (AVS-B-WP+S) provides reliable visual alerts as required by AS 4214 and ISO 14520. The device also produces clear audible tones and voice messages.

The audio visual warning sign uses the latest LED technology to provide high visibility.

It is housed in an IP-66 rated weatherproof enclosure.

An on-board microcontroller provides an eight stage selectable backlight operating modes and a 90 second (maximum) countdown timer.

An LED matrix is available as an option for visual indication of the countdown timer.

The visual warning sign supports 2, 3, or 4-wire connections.

Configuration DIP switches provide tone control for each of two stages.
